Phi-4-mini brings significant enhancements in multilingual support, reasoning, and .mathematics, and now, the long-awaited function calling feature is finally supported

3.8b tools

JavaScript Python cURL CLI

ollama run phi4-mini

Applications

	Claude Code ollama launch claude --model phi4-mini
	OpenClaw ollama launch openclaw --model phi4-mini
	Hermes Agent ollama launch hermes --model phi4-mini
	Codex ollama launch codex --model phi4-mini
	OpenCode ollama launch opencode --model phi4-mini

Models

Input	Context	Size / Usage	Name
Text	128K	2.5GB	phi4-mini:latest
Text	128K	2.5GB	latest phi4-mini:3.8b

.Note: this model requires [Ollama 0.5.13](#) or later

Phi-4-mini-instruct is a lightweight open model built upon synthetic data and filtered publicly available websites - with a focus on high-quality, reasoning dense data. The model belongs to the Phi-4 model family and supports 128K token context length. The model underwent an enhancement process, incorporating both supervised fine-tuning and direct preference optimization to support precise instruction adherence and robust safety measures.

Primary use cases

The model is intended for broad multilingual commercial and research use. The model provides uses for general purpose AI systems and applications which require

- Memory/compute constrained environments
- Latency bound scenarios
- Strong reasoning (especially math and logic)

The model is designed to accelerate research on language and multimodal models, for use as a building block for generative AI powered features
